

Nolina nelsonii

common name Blue Nolina

origin Mexico

nature Small tree- like species with a thick straight trunk that can reach up to 2 metres tall. Extremely drought tolerant and frost tolerant (down to -12C)

pot size

300mm	500mm	200litre
400mm	100litre	500litre

growth Up to 2 m

leaves Stiff, rigid, blue foliage which is soft to touch.

soil Most soil types, good drainage

requirements Full sun, little water if in a pot, prune lower leaves to produce a “pineapple” look and also exposes the trunk. Low maintenance. No water other than rainfall if in ground.
